Attainment of Reduction in Measurement Time

Z-axis Motor Drive & Vision Unit

Simple Focus Adjustment

Ultra-high Speed AF Function

The ultra-high speed AF function has been installed to allow focusing on a surface to be measured at a speed of about one second.

Freedom from burdensome focus adjustment even on a workpiece with many asperities allows the operator to perform stress-free measurement, drastically reducing operator's fatigue.

Application example: Cumulative total time of 3mm step-height measurement 10 times

* The amount of time saved is dependent on the particular workpiece and therefore this result is offered as an example but does not guarantee performance in all cases.

Simplified Measurement

One-click Tool

The concurrent use of the vision unit as a vision measurement system allows simplified measurement of an edge by merely one click. Moreover, since many data points can be obtained at a time with just one click, this will drastically speed up measurement and reduce data spread compared with the conventional method of "measuring data points one by one with cross hairs".

* Vision unit: Option

One-click circle tool

One-click box tool

Easy Positioning

Quick Release Function

This series is equipped with a manual stage that provides intuitive positioning and has a quick release function that enables rapid movement between measuring points that are a large distance apart.

Amazing Speed-up

NEW
Products

Feature

Excellent Observability and Operability

Ultra-wide View Field and High Magnification Observation

Field Number: 24

This measuring microscope series has achieved an industry-leading wide field of view of $\phi 24\text{mm}$ (when using 1x objective).

A Camera Port on All Models

All models are equipped with a C-mount port as standard to which a compatible camera is attachable. The port allows a vision measurement system or an observation-specific digital camera to be mounted.

Lineup of a Wide Range of Objectives

The objectives available provide a choice of ultra-low magnification, for excellent flare suppression, to high magnification that approaches the resolution limit possible with optical wavelengths, allowing the customer to select an optimal magnification depending on the intended use.

Intuitive Operation

Quick Release Mechanism

The manual stage provides intuitive positioning and can be easily moved rapidly between measuring positions on a workpiece by using the quick release function on each axis. Just free a Quick Release Wheel and move the stage by pushing and pulling. Lock the wheel to continue measurement with fine feed. Very effective for traversing between widely separated positions.

Vision Unit

The vision unit allows anyone to perform simplified measurement of an edge with just one click. Also, using the vision unit eliminates the need for burdensome parallel alignment of a workpiece and data point detection with cross hairs, thus allowing quick inspection of dimensions.

High-accuracy Measurement and Reliability

Best-in-Class Accuracy As of April, 2016

X/Y Axis: $(2.2+0.02L) \mu\text{m}$

All models have achieved best-in-class accuracy performance. Since the accuracy of the whole system is ensured by conformity to the inspection method of JIS B 7153, any model enables high-accuracy measurement. Any measuring microscope that achieves this accuracy performance (close to JIS Class 0) will be a great asset to the customer's quality control improvement program.

Reference) Measuring accuracy of each axis of a JIS B 7153 measuring microscope (at 20°C)
Grade 0: $(2+0.01L) \mu\text{m}$ or less
Grade 1: $(4+0.02L) \mu\text{m}$ or less
L: measured length (mm)

A Wide Choice of Stage Size

Precisely because measuring microscopes in this series are widely used in widely different industries, Mitutoyo offers a choice of stage size from 100x100mm to maximum-in-class 400x200mm. The customer can choose the optimal size for the application with accuracy performance guaranteed.

Extraordinary Reliability ~ Traceability to National Standards ~

Use of Master Gages Traceable to National Standards

Measurement results obtained from these microscopes are traceable to national standards to guarantee compliance with quality control systems. This is achieved through ensuring that all Mitutoyo master calibration gages and facilities are themselves traceable to national standards.

Feature

MF Series – User-friendly Standard Model –

Reduction in Magnification Error due to Variation in Point of Focus

Telecentric Optical System

In order not to change the observing magnification even at low magnification (10x or less) where the objective's precise working distance is difficult to accurately reproduce because of a wide focal depth, this series has adopted the telecentric optical system that reduces the magnification error due to slight variation in working distance.

Also, the MF series objectives are manufactured with a more accurate magnification due to Mitutoyo's unique specification that surpasses JIS Standards. This optimizes comparative measurement with a reticle.

Safe Operation

Ultra-long Working Distance

An ultra-long working distance is ensured in the entire lineup of a wide variety of objectives between 1x and 100x. This practically eliminates any risk of collision with a workpiece even when surface asperities are present.

Working distance	Objective
61.0mm	ML1x
77.0mm	ML3x
61.0mm	ML5x
51.0mm	ML10x
20.0mm	ML20x
13.0mm	ML50x
6.0mm	ML100x

Easy Change of Magnification

Sliding Nosepiece

The MF series usually allows only a single objective to be mounted which needs to be replaced for every magnification change. The sliding nosepiece allows up to two objectives to be mounted.

In the case of measurement that needs frequent magnification change, this nosepiece design drastically improves workability. (Refer to page 20 for details)

Feature

MF-U Series – Universal Model Dealing with Diverse Observation Methods –

Clear Observation Image

Apochromat Lenses

This series provides a clear observation image with excellent color quality, ultra-long working distance for high operability and apochromatic design that eliminates chromatic aberration.

Ordinary observation (bright-field)

Differential interference : Allows observation of microscopic asperities hard to detect with ordinary bright-field observation.

Ordinary observation (bright-field)

Dark-field: Allows highlighted observation of microscopic abnormalities such as flaws and contamination by using diffused light.

Polarization Unit

Used when performing simple polarized observation.
It is also recommended to use this unit for increasing image contrast during use of a low-magnification lens.

Differential Interference Unit

Used when performing differential interference observation.
This unit is used in combination with the polarization unit.

Simplified Report/Storage Function

This series has the functions to perform tolerance verification of measurement/calculation results, various statistical processing for each item and image load/storage, enabling storage of measurement results and images at measured points.

Since measurement results can also be outputted in the CSV format, this allows smooth creation of inspection table.

Optional Accessories

Camera/Images

Vision Unit Dedicated Software - QSPAK -

Simple/Universal Mode Switching (EZ/PRO)

In the EZ mode for Simple & Operation guidance display, this software allows even a beginner to perform measurement without any confusion using the easy-to-understand measurement icons and guidance function. Also, it supports the needs of more advanced measurement by the ability to switch to the PRO mode where the full functions of QSPAK are supported.

Simple Edit of Measurement Program (Smart Editor)

This function simply enables program correction/edit by only selecting an item you want to edit from among existing programs.

Edge Detection Functions

- Outlier Removal Function** Removes outliers such as burrs and chips.
- Dual-area Contrast Tool** Automatically adjusts the light intensity of two areas to the optimum.
- Auto Trace Tool** Automatically detects contour data while predicting the next one.
To perform contour analysis and contour tolerancing, use 2-dimensional analysis software (FORMTRACEPAK-AP).

Optional Accessories

Camera/Images

Vision Unit

Dedicated Software - QSPAK -

System example

Simplified Multi-point Measurement (One-click Tool)

A mere click on an edge allows correct measurement, avoiding the variation inherent in conventional multi-point measurement. The function to remove outliers such as burrs and chips can be used concurrently.

One-click circle tool

One-click box tool

Graphics Function

This function automatically displays the current position, coordinate system, measurement feature and measurement result on the graphics window to prevent an omission or error of measurement from occurring. It also enables you to grasp which portion of the whole workpiece is observed by importing 2-dimensional CAD data*.

* Optional software (For details refer to Page 15.)

Navigation Function (Quick Navigation)

Once a measurement program is created, anyone can measure a workpiece just as well as skilled personnel by merely following the navigation instructions at the next measuring point.

(1) The next measuring point is indicated with red cross hairs.

(2) Approaching the measuring point, the red cross hairs and green cross hairs come close to each other.

(3) When both cross hairs overlap one another while indicating the target point, press the Input button to complete the measurement.

Optional Accessories

Camera/Images

Optional Software

2-dimensional Analysis Software - **FORMTRACEPAK-AP** -

FORMTRACEPAK-AP allows contour analysis and comparative verification with the nominal value, making use of the point group data acquired with the auto trace tool.

Form analysis can be performed seamlessly from measured images with simple operations.

Example of form analysis

Contour tolerancing against the nominal value is also enabled. For example, the software allows over-pin diameter measurement by defining virtual circles with a given diameter around a gear.

Example of gear contour matching, and an over-pin diameter analysis

Effective use of CAD model - **QS-CAD I/F** -

2-D CAD model data (DXF-, or IGES-formatted) can be imported into QIPAK. Conversely, QIPAK measurement results can be converted into 2-D CAD model data. The design value for each measurement item is automatically entered. Since the graphics window makes the present location easy to identify, the operator can quickly move the stage a given point in the 2D CAD model.

Early detection of process irregularities - **MeasurLink** -

Statistical data can be displayed in real-time, making early detection of process irregularities possible. Early identification of an out-of-control situation enables rapid remedial action to be taken when necessary.

Examples of remedial action

- Mold repair or cycle-timing change
- Cutting tool adjustment or replacement.

Specifications

Vision Unit 10D	
Order No.	359-763
Magnification of optical system	0.5X: when a microscope is attached (0.5X: when using a TV adapter)
Image detection	High sensitivity 1/2-inch CMOS color camera with 300 million pixels
Resolution	0.1μm
Measuring accuracy for each axis (in a 20°C environment)	Depends on measuring microscope
Accuracy (in a 20°C environment)	Depends on measuring microscope Reference: when using a 3X ML objective (performing an inspection using our standard sample) Screen-internal measuring accuracy: ±2.5μm or less Screen-internal repeatability (2σ): ±1μm or less
PC system*	Windows 7
Software*	QSPAK Vision Unit
Applicable model	MF D / MF-U D

* Software (QSPAK) and calculation processor are required separately.

Calibration Chart

Calibration Chart

This chart is used for pixel-size correction of the CCD, and auto-focus accuracy and optical-axis offset corrections for each selected magnification.

* The function may be limited depending on the lens.
For detailed information, contact a Mitutoyo sales office.

Order No. 02ATN695

Others

C-mount Adapter

This adapter is used to mount a C-mount compatible digital camera on the microscope main unit.

Order No. 970441

0.5x TV Adapter (including C-mount Adapter)

This adapter is used to mount a C-mount compatible digital CCD camera on the microscope main unit, thereby making an observation area on the monitor close to the real field of view through the objective.

Order No. 375-054

Optional Accessories

Camera/Images

Calculation processing

Data Processing Applications

2-dimesinal Data Processing Unit QM-Data200

Order No.: **264-155**

Application: QM-Data200 allows various data processing operations and creation of measurement programs without needing any other data processing unit.

Resolution: 0.1μm

Program function: Creation, execution and editing of measurement procedures

Statistical processing: Measurement items, number of data, maximum value, minimum value, mean value, standard deviation, range, histogram and statistics by measurement function (statistics by command)

Display: TFTLCD (with LED backlight)

Tilting mechanism: Installed

Foot Switch

Order No.: **12AAJ088**

Application: Foot switch for data transfer
A measurement result can be transferred to the data processing unit by stepping on the switch while holding the feed wheels.

* View field with CCD camera is a view field when using Mitutoyo Vision Unit (P12-P16).

ML Objectives

Compatible observation method: Bright-field observation

Advantage: A measurement error is reduced with the correct magnification.

The telecentric optical system is adopted for a magnification of 10x or less to reduce measurement error due to an out-of-focus condition.

Sliding Nosepiece (Factory-set Option)

Two ML objectives can be mounted, allowing stress-free change of magnification.

· Parfocal Type (Order No. 176-370-1)

Identical focal lengths of mounted objectives eliminates the need for refocusing after every objective change.

· Magnification Type (Order No. 176-370-2)

The magnifications of both mounted objectives are guaranteed.

This is the recommended nosepiece to use when a reticle is mounted in the optical tube.

Objectives for the MF-U Series

M Plan Apo Objectives

Compatible observation method: Bright-field observation, simple polarized observation, differential interference observation

Advantage: Plan apochromat lenses free of spherical aberration/chromatic aberration are adopted to obtain images with excellent color reproducibility without blur over the entire field of view.

G Plan Apo Objectives

Compatible observation method:

Observation through a cover glass

Advantage: Correction design is performed so as to obtain optimal observation images when observing through the glass.

(Corrected on the basis of BK7 and a cover glass thickness of 3.5mm. Custom order of other glass material and thickness is also available.)

BD Plan Apo Objectives

Compatible observation method: Bright-field observation, dark-field observation, simple polarized observation, differential interference observation

Advantage: Dark-field observation is also supported while maintaining the performance of the M Plan Apo objective series.

* SL: Super long working distance model HR: High Resolution model

* View field with CCD camera is a view field when using Mitutoyo Vision Unit (P12-P16).

Turret

Supported observation		Bright field (M Plan Apo/G Plan Apo)			Bright and dark field (BD Plan Apo)	
Order No.	For normal model	378-018	378-016	378-216	176-211	176-212
	For LAF model	176-410			176-412	
Driving method		Manual	Electric		Manual	Electric
Number of ways		4	4	5	4	4

* When using the turret without parfocal mechanism and objectives, it is recommended to concurrently use "Parfocal Adjustment SIMM Set" (for bright-field observation: Order No. 378-089, for dark-field observation: Order No. 378-090).

Optional Accessories

Rotary tables

Rotary table with Fine Wheel (A)

Order No.: **176-305**

Application: Workpiece orientating/positional fine-adjustment

External dimension: 280 (W)×280 (D)×23.7 (H)mm

Tabletop: $\varnothing 240\text{mm}$, 360° rotation, no angle scale

Mass: 5.5kg

Effective glass diameter (mm): $\varnothing 182$

Applicable model: Size 1010, 2010 (**MF/MF-U series**)

*Option: 172-197 Swivel Center Support

176-107 Holder with Clamp

172-378 V-block with Clamp

Rotary table with Fine Wheel (B)

Order No.: 176-306

Application: Workpiece orientating/positional fine-adjustment

External dimension: 342 (W)x342 (D)x23.2 (H)mm

Tabletop: $\varnothing 270\text{mm}$, 360° rotation, no angle scale

Mass: 6.5kg

Effective glass diameter (mm): $\varnothing 238$

Applicable model: Size 2017, 3017, 4020 (MF/MF-U series)

*The V-block with Clamp, Swivel Center Support and Holder with Clamp can NOT be mounted on the table.

Stage Adapter

Order No.: Stage Adapter: **176-304**

Stage Adapter B: 176-310

Application: Used when setting the workpiece fixture on the stage.

External dimensions for one piece:

50 (W)×340 (D)×15 (H)mm

*Note) Adapter B is 280 (D)

Mass: Stage Adapter: 1.5kg

Stage Adapter B: 1.2kg

176-304 Stage Adapter

		Stage size		
		1010	2010	2017 3017 4020
176-304	Stage Adapter	—	Not applicable	Applicable
176-310	Stage Adapter B	—	Applicable	Not applicable

Note: Not required for model 1010.

176-310 Stage Adapter

Optional Accessories

Others

Holder with Clamp

Order No.: **176-107**

Application: Used to clamp a thin workpiece such as a PCB or pressed part.

Maximum clamp length: 35mm

External dimensions: 62 (H)×152 (W)×38 (D)mm

Mass: 0.4kg

*Note: Size 2010 is used with stage adapter B. Sizes 2017, 3017, and 4020 are usable with stage adapter

V-block with Clamp

Order No.: **172-378**

Maximum clamping diameter: $\phi 25$ mm

Height from the mounting surface to the center: 38-48mm

Application: Used to mount a cylindrical-form workpiece.

External dimensions: 117 (H)×90 (W)×45 (D)mm

Mass: 0.8kg

*Note: Size 2010 is used with stage adapter B. Sizes 2017, 3017, and 4020 are usable with stage adapter

Swivel Center Support

Order No.: **172-197**

$\pm 10^\circ$ for swivel position

Maximum angle index: 1°

Application: Used to mount a center-machined workpiece for measurement of screw pitch diameter, depth, etc.

Maximum horizontal clamping size: $\phi 80 \times 140$ mm

Maximum clamping size when inclined 10° : $\phi 65 \times 140$ mm

Mass: 2.5kg

*Note: Size 2010 is used with stage adapter B. Sizes 2017, 3017, and 4020 are usable with stage adapter

Stage Micrometer

Order No.: **375-056**

Scale length: 1mm

Minimum graduation: 0.01mm

Scale accuracy: $1 + L(\mu\text{m})$ L: length between any two lines (mm)

External dimensions: 76(W)×26(D)

Mass: 16g

*Note: After purchasing the product, we perform calibration. For details, contact your nearest Mitutoyo Sales Office.

Mounting Stand (for Microscope)

Order No.: **176-309**

Application: Microscope main unit mounting stand

Maximum loading: 300kg

External dimensions: 1200 (W)×900 (D)×650 (H)

Mass: Approximately 50kg

Applicable model: **MF/MF-U**

*Note: When specifying a microscope with the Vision Unit, we recommend selecting the large mounting stand **No. 02ATE760**, which has external dimensions of 1,800 (W)×900 (D)×740 (H).

Vibration Damping Stand

Order No.: **176-308**

Application: Microscope vibration isolation table

Supporting method: Spring pad

Maximum loading: 200kg

External dimensions: 750 (W)×550 (D)×36 (H)

Mass: 36kg

Applicable model: **MF/MF-U**

Optional Accessories

Internal light source

LED Illumination Unit

The LED illumination unit has a longer operating life than a halogen bulb. This reduces running costs and saves the trouble of replacing the bulb. Also, a quick response to light control allows stress-free search for the illumination condition best suited to a workpiece.

For MF series: Transmitted/Reflected illumination Set **Order No. 176-445**

For MF-U series: Transmitted/Reflected illumination Set **Order No. 176-446**

Order No.176-445

Halogen Illumination Unit

Select this illumination unit when measuring a low-reflectivity workpiece rather than the standard LED illumination unit.

For MF series: Transmitted/Reflected illumination Set **Order No.176-447**

For MF-U series: Transmitted **Order No.176-448**

Reflected 100W (Standard) **Order No.176-315**

150W (High brightness) **Order No.176-316**

Order No.176-447

Order No.176-316

Illumination filter

Select the optimal filter depending on the intended use.

GIF filter: Emphasizes contrast in the image.

LB filter: Converts the warm-colored halogen light to a more natural color.

ND filter: Reduces illumination intensity without changing the observation condition (color temperature) in spite of the fact that halogen light becomes redder when darkened by decreasing the voltage.

ND2: Light intensity 1/2 (transmission factor 50%) ND8: Light intensity 1/8 (transmission factor 12.5%)

Light source	Applicable model	Order No.	Illumination method	GIF	LB80	ND2	ND8
LED illumination	MF	176-445	Transmitted/ reflected	12AAA645	—	—	—
	MF-U	176-446					
Halogen illumination	MF	176-447	Transmitted/ reflected	12AAA645	12AAA646	12AAA643	12AAA644
		176-448	Transmitted	12AAA645	12AAA646	12AAA643	12AAA644
	MF-U	176-315	Reflected (100W)	12AAG806	12AAG807	—	—
		176-316	Reflected (150W)	—	—	—	—

Optional Accessories

External light source

LED Ring Light

For MF series : **Order No.176-367-2** (Standard)
 : **Order No.176-371** (Specific to Sliding Nosepiece)
 For MF-U series : Please contact with your local Mitutoyo Sales Office.

This illumination unit provides a high image contrast for observation of deep-color resins, PCBs and small-diameter cylinders, thus providing optimal performance for vision measurement. Even if the brightness of illumination is changed, no color will change.

* The ring light illumination is compatible with ML objectives of 10x or less. If an objective with a magnification of more than 10x is used, there is a risk of difficulties in observation due to insufficient light intensity.

Mounted on MF series

Mounted on MF-U series

Fiber-Optic Ring Light

For MF series: **Order No. 176-366** (Standard)

The Fiber-Optic Ring Light is the best unit to use when a bright, shadowless image is required. This illumination is best suited to observation at high magnifications and vision measurement.

* The ring light illumination is compatible with ML objectives of 10x or less. If an objective with a magnification of more than 10x is used, there is a risk of difficulties in observation due to insufficient light intensity.

Dual swan-neck light pipe

For MF and MF-U series: **No. 176-343**

This illumination unit highlights the features of a workpiece surface by applying oblique light to it, forming shadows which aid viewing. High-brightness spot lighting is also available by the concurrent use of the standard-supplied condenser lens.

Specifications

MF Series

	Observation method	Bright-field observation / dark-field observation (Only for MF-UC and MF-UD types) Simple polarization and differential interference are optional.								
Eyepiece		10X (eyepiece field number: 24) is provided as standard 15X, 20X are optional.								
Turret		Manual, motor drive* ⁵								
Objective	Bright-field (BF)	M Plan Apo, G Plan Apo series								
	Bright-field/dark-field (BD)	BD Plan Apo series								
Z axis	Feed mechanism	Motor drive (Maximum measuring speed: 20mm/s), lower limit setting (for collision avoidance with a workpiece)								
	Max. workpiece height	220mm								
Stage	Measurement range	200×170mm	300×170mm	400×200mm	200×170mm	300×170mm	400×200mm	200×170mm	300×170mm	400×200mm
	Max. table loading	20kg		15kg	20kg		15kg	20kg		15kg
	Feed mechanism	Manual and Quick-release mechanism (zero-set switch is incorporated)			Motor drive (Maximum measuring speed: 40mm/s)					
	Swiveling angle	±5°		±3°	±5°		±3°	±5°		±3°
Internal light source	LED Illumination Unit	White LED (transmitted/vertical reflected), no step modulated light								
	Halogen Illumination Unit	12V50W halogen (transmitted), no step modulated light 12V100W (vertical reflected), no step modulated light 15V150W(vertical reflected), no step modulated light are optional.								
External light source		Dual swan-neck light pipe are optional.								
Output		RS-232C output, USB output for Vision Unit								
Dimensions (W×D×H)	Main unit	632×892×782mm	682×892×782mm	757×907×782mm	632×892×782mm	682×892×782mm	757×907×782mm	608×790×846mm	658×790×846mm	733×790×846mm
	Control unit	355×364×106.5mm								
	Control unit for illumination unit	114×360×96mm								
Mass		Approx. 160kg	Approx. 170kg	Approx. 175kg	Approx. 160kg	Approx. 170kg	Approx. 175kg	Approx. 165kg	Approx. 175kg	Approx. 180kg
Max. power consumption* ³		LED: 285W Halogen: 420W (vertical reflected 12V100W) and (vertical reflected 15V150W) AC power input connector: 100-240V								

• Required optional accessory

*1 To denote your AC power cable add the following suffixes to the order No.: A for UL/CSA, D for CEE, DC for CCC, E for BS, K for KC, C and No suffix are required for PSE.

*2 Measured in conformance with JIS B 7153

*3 Optional accessory is NOT target (Main unit, required optional illumination, and control unit are target)

*4 C mount is required separately.

*5 RS-232C cable (No. 12AAA807) is required when you select a motorized LAF model and a power turret.

Whatever your challenges are, Mitutoyo supports you from start to finish.

Mitutoyo is not only a manufacturer of top quality measuring products but one that also offers qualified support for the lifetime of the equipment, backed up by comprehensive services that ensure your staff can make the very best use of the investment.

Apart from the basics of calibration and repair, Mitutoyo offers product and metrology training, as well as IT support for the sophisticated software used in modern measuring technology. We can also design, build, test and deliver bespoke measuring solutions and even, if deemed cost-effective, take your critical measurement challenges in-house on a sub-contract basis.
